Vosters, P. J. C., 147

Wallwork, G. R., 1, 75

Wang, Dacheng, 111

Subject Index to Volume 20

- Basaltic lava, corrosion effect on ferritic stain-
less steels and Fe-Cr alloys, 161
Brittle coatings, mechanical behavior, 193
- Chemical composition, thin Nb_2O_5 films, 185
Chromium, corrosion in oxygen-sulfur-
carbon gases, 111
Coatings, brittle, mechanical behavior, 193
Coatings, plasma-sprayed, 67
Cobalt, displacement reaction with Cu_2O ,
147
Co-Cr-W alloys, oxidation, 37
Corrosion of Ni in SO_2 , 217
 Cu_2O , displacement reaction with Ni or Co,
147
- Displacement reaction, Ni or Co and Cu_2O ,
effect of impurities, 147
- Ferritic stainless steels, corrosion in basaltic
lava, 161
- Impurities, effect on displacement reaction
between Ni or Co and Cu_2O , 147
Iron-Chromium alloys, corrosion in basaltic
lava, 161
Iron-Chromium-Aluminum alloys, oxida-
tion, 75
Iron-Manganese alloys, oxidation, 1
- Low-carbon steel, effect of cycling on spalling
of oxides, 19
- Magmatic gas, corrosive effect on ferritic
stainless steels and Fe-Cr alloys, 161
Mechanical behavior, brittle coatings, 193
Microcalorimetry, application of, in oxidation
studies, 241
- Nb_2O_5 films, chemical composition, 185
Ni-Base superalloys, cyclic oxidation, 255
Nickel-Chromium, corrosion in O-S-C gases,
111
Nickel, corrosion in SO_2 , 217
Nickel, displacement reaction with Cu_2O ,
147
- Plasma oxidation, Nb, 185
Plasma-sprayed coatings, 67
- Spalling, effect of thermal cycling, 19
Sulfur-Carbon-Oxygen gases, corrosion of Ni
and Ni-Cr alloys, 111
Superalloys, Ni-base, cyclic oxidation, 225
- Thermal barrier coatings, 67
Thermal cycling, effect on oxidation of steel,
19

Instructions to Contributors

1. Manuscripts should be sent to:

Prof. D. L. Douglass
Materials Department
Room 6531, Boelter Hall
University of California at Los Angeles
Los Angeles, California 90024

2. Submission is a representation that the manuscript has not been published previously and is not currently under consideration for publication elsewhere. A statement transferring copyright from the authors (or their employers, if they hold the copyright) to Plenum Publishing Corporation will be required before the manuscript can be accepted for publication. The Editor will supply the necessary forms for this transfer. Such a written transfer of copyright, which previously was assumed to be implicit in the act of submitting a manuscript, is necessary under the new U.S. Copyright Law in order for the publisher to carry through the dissemination of research results and reviews as widely and effectively as possible.
3. Type double-spaced, and submit the original and two copies (including, where possible, copies of all illustrations and tables).
4. An abstract of 150 words or less is to be provided.
5. A list of 4-5 key words is to be provided directly below the abstract. Key words should express the precise content of the manuscript, as they are used for indexing purposes, both internal and external.
6. Illustrations (photographs, drawings, diagrams, and charts) are to be numbered in one consecutive series of Arabic numerals. The captions for illustrations should be typed on a separate sheet of paper. Photographs should be large, glossy prints, showing high contrast. Drawings should be prepared with india ink. Either the original drawings or good-quality photographic prints are acceptable. Identify figures on the back with author's name and number of the illustration.
7. Tables should be numbered and referred to by number in the text. Each table should be typed on a separate sheet of paper.
8. References should be made by using superscript Arabic numerals, and the full references should be given in a list at the end of the paper. For maximum clarity, abbreviations should be avoided in the references. Whenever a book is cited, the number of the relevant chapter should be given.
9. In general, *Oxidation of Metals* follows the recommendations of the American Institute of Physics in their *Style Manual*, and it is suggested that contributors refer to this publication.
10. **The journal makes no page charges.** Reprints are available to authors, and order forms are sent with proofs.

OXIDATION OF METALS

Vol. 20, Nos. 5/6

December 1983

Chemical Composition and Interface Chemistry of Very Thin Nb_2O_5 Films Prepared by rf Plasma Oxidation <i>R. A. Pollak, H. J. Stoltz, S. I. Raider, and R. F. Marks</i>	185
On the Mechanical Behavior of Brittle Coatings and Layers <i>A. G. Evans, G. B. Crumley, and E. Demaray</i>	193
The Corrosion of Nickel in 1 atm of Pure SO_2 at 600–1000°C and the Mechanism of Formation of the Two-Layered Scales <i>F. Gesmundo, C. de Asmundis, and P. Nanni</i>	217
Application of Microcalorimetry in Studies of Interaction Between Oxygen and NiO Single Crystals <i>R. Lalauze, M. Soustelle, M. Rekas, and J. C. Le Thiesse</i>	241
The Effects of Cr, Al, Ti, Mo, W, Ta, and Cb on the Cyclic Oxidation Behavior of Cast Ni–Base Superalloys at 1100 and 1150°C <i>C. A. Barrett, R. V. Miner, and D. R. Hull</i>	255
Announcement	279
